## Correction: Aliovalent A-site engineered AgNbO<sub>3</sub> lead-free antiferroelectric ceramics toward superior energy storage density

Nengneng Luo,<sup>\*af</sup> Kai Han,<sup>a</sup> Fangping Zhuo,<sup>b</sup> Chao Xu,<sup>c</sup> Guangzu Zhang,<sup>d</sup> Lajun Liu,<sup>e</sup> Xiyong Chen,<sup>a</sup> Changzheng Hu,<sup>e</sup> Huanfu Zhou<sup>e</sup> and Yuezhou Wei<sup>\*a</sup>

Correction for 'Aliovalent A-site engineered AgNbO<sub>3</sub> lead-free antiferroelectric ceramics toward superior energy storage density' by Nengneng Luo *et al.*, *J. Mater. Chem. A*, 2019, DOI: 10.1039/c9ta02053e.

The authors regret an error in the published article. The phrase "In contrast, the  $\Delta G_{\text{FE-AFE}}$  for the FE-to-AFE phase transition is flattened, corresponding to decreased  $E_A$ " should instead have read as follows: "The  $\Delta G_{\text{FE-AFE}}$  for the FE-to-AFE phase transition, in contrast, is flattened, which also contributes to increased  $E_A$ ".

The Royal Society of Chemistry apologises for these errors and any consequent inconvenience to authors and readers.
